

Interior finish package

Graphite

The Graphite package is a contemporary and stylish interior design that uses bold and contrasting materials and colours to create a modern and elegant living environment.

Minimalist inspiration

Gives depth and elegance to the space.

The rooms feature herringbone parquet flooring, a classic and timeless flooring with an elegant pattern that adds sophistication and texture to the space, creating a harmonious blend of traditional style and modern comfort.

The Graphite tile is made in neutral and dark tones, which give the interior an urban and stylish look. The tile is used in the hallway and in the bathrooms.

Black faucets and switches complement the entire design, creating a modern accent.

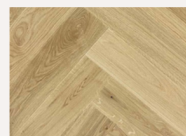

The Graphite interior package is a bold and stylish choice that combines classic and contemporary elements. The result is a harmonious and visually appealing living environment.
